

ZENNER Fire Hydrant Meter Locks

ZHLB and ZHLP Zenner Fire Hydrant Meter Locks

ZBHLB and ZBHLP Zenner Universal Break-away Fire Hydrant Meter Locks

U.S.A. Patent No. US 659551

INTRODUCTION: ZENNER Fire Hydrant Meter Locks are designed to easily secure hydrant meters quickly and effectively. These unique hydrant locks allow utilities to “throw away the chains.” They are easy to install and keep hydrant meters safe from theft.

OPERATION: ZENNER Fire Hydrant Meter Locks are easy to install. They are of a clam shell design which when closed and locked over the swivel, the hydrant meter may not be removed. The Universal Break-away model restricts access to the swivel while at the same time allowing for the hydrant meter to break-away at the swivel rather than damage the hydrant.

CONSTRUCTION: ZENNER Fire Hydrant Meter Locks are made of cast aluminum.

OPTIONS: ZENNER Fire Hydrant Meter Locks are designed to be used with either a Padlock or a Barrel Lock.
